

**Glassy-Winged Sharpshooter Project
Department of Pesticide Regulation
830 K Street
Sacramento, CA 95814**

Sacramento County

Trip Date:

August 16-18, 2000

Sampling Site:

Mobil Country Club
Rancho Cordova, CA

Field Staff:

Pam Wofford and
Johanna Walters

Purpose: To monitor carbaryl residues from its use in glassy-winged sharpshooter control second application.

Spray crew makes second application of carbaryl, 14 days after first application.

Sample was taken from water basin in a water treatment plant, which is about 64 yards east of the carbaryl treatment area (right of photo).

The following samples were taken

- Tank samples
- Air samples at four intervals at two sites
- Dislodgeable foliage residue samples
- Creek water samples
- Water samples at Coloma Treatment Plant (2 ponds)
- Post-spray swimming pool water sample
- Vegetable (tomato) samples will be taken at preharvest interval.
